Engineers Comments Regarding Surface Water Drainage

1. Please provide silt traps (or sumps on inspection chambers) upstream of the soakaways. Whilst it is acknowledged that the concrete ring soakaways are accessible for clearance, silt traps are easier to clear.
2. Please provide a construction detail for a concrete pipe bed and surround for where pipe depths are less than 900mm. Plus amend note as to when each surround should be used (Granular where cover to crown

is greater than 1200mm in vehicular areas, or greater than 900mm elsewhere. For shallower depths concrete surround.)

3. Please provide a construction detail for the inspection chambers, and silt traps (see point 1).
4. Please confirm the dimensions of the trial pits within the Surface Water Drainage Notes.

Kind Regards

Sarah Burrow

Engineering Assistant, Engineers
