

Recommendation Report for Planning Permission for Works or Extension to a Dwelling

REF NO: AL/45/17/HH

LOCATION: 11 Lidsey Road
Woodgate
Chichester

PROPOSAL: Single storey side & rear extensions.

SITE AND SURROUNDINGS

DESCRIPTION OF APPLICATION

As above

The proposed extension measures 5.3m deep (it is noted the rear part of the extension behind the rear elevation of the house would extend off an existing extension and be only 2.85m at this point), 6m wide and 2.7m high with a flat roof and lantern rooflight. The width of the proposed extension extends 2m beyond the side elevation of the existing house.

Materials would match the existing property.

SITE AREA

N/A

RESIDENTIAL DEVELOPMENT DENSITY (NET)

N/A

TOPOGRAPHY

Predominantly flat

TREES

None of any significance affected by the proposed development.

BOUNDARY TREATMENT

The rear of the property has a timber fence approximately 1.8m high

SITE CHARACTERISTICS

The application site comprises a detached chalet bungalow constructed of render beneath a tile roof. The property has an existing L shaped single storey addition at the rear and also a dormer window in the rear roofslope. The property has a gravel drive to the side and rear.

CHARACTER OF LOCALITY

The wider area comprises residential properties of varying design and size located on a busy A road. To the north of the site is a rectangular piece of open land leading to the electricity sub station.

RELEVANT SITE HISTORY

AL/12/17/HH

Single storey rear extension.

ApproveConditionally

03-04-2017

Planning permission was granted for a single storey rear extension on 3 April 2014 AL/12/17/HH the current proposal retains the same depth of extension to the rear but adds the additional 2m to the side.

Engineers (Drainage)

Consultations responses received:

:

Infiltration to be investigated to drain new roof areas.

Please apply standard conditions ENGD2A.

Infiltration rates for soakage structures are to be based on percolation tests undertaken in the winter period and at the location and depth of the proposed structures. The percolation tests must be carried out in accordance with BRE 365, CIRIA R156 or a similar approved method and cater for the 1 in 10 year storm between the invert of the entry pipe to the soakaway, and the base of the structure. It must also have provision to ensure that there is capacity in the system to contain below ground level the 1 in 100 year event plus 30% on stored volumes, as an allowance for climate change.

Adequate freeboard must be provided between the base of the soakaway structure and the highest recorded annual groundwater level identified in that location. Any SuDS or soakaway design must include adequate groundwater monitoring data to determine the highest winter groundwater table in support of the design. The applicant is advised to discuss the extent of groundwater monitoring with the Council's Engineers. Supplementary guidance notes are also enclosed for information.

Southern Water commented:

Please find attached a plan of the sewer records showing the approximate position of a public foul sewer within the site.

- No works parallel to the sewer within 500mm (in plan).
- No new soakaways should be located within 5 metres of a public sewer.

Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.

The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk.

Southern Water requires a formal application for a connection to the public foul sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

"A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".

The Council's Building Control officers or technical staff should be asked to comment on the adequacy of soakaways to dispose of surface water from the proposed development.

The planning application form makes reference to drainage using Sustainable Urban Drainage Systems (SUDS).

Under current legislation and guidance SUDS rely upon facilities which are not adoptable by sewerage undertakers. Therefore, the applicant will need to ensure that arrangements exist for the long term maintenance of the SUDS facilities. It is critical that the effectiveness of these systems is maintained in perpetuity. Good management will avoid flooding from the proposed surface water system, which may result in the inundation of the foul sewerage system.

Thus, where a SUDS scheme is to be implemented, the drainage details submitted to the Local Planning Authority should:

- Specify the responsibilities of each party for the implementation of the SUDS scheme
- Specify a timetable for implementation
- Provide a management and maintenance plan for the lifetime of the development.

This should include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime.

It is the responsibility of the developer to make suitable provision for the disposal of surface water. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order

a Adequate soakaway or infiltration system

b Water course

c Where neither of the above is practicable sewer

Southern Water supports this stance and seeks through appropriate Planning Conditions to ensure that appropriate means of surface water disposal are proposed for each development. It is important that discharge to sewer occurs only where this is necessary and where adequate capacity exists to serve the development. When it is proposed to connect to a public sewer the prior approval of Southern Water is required

Due to surface water inundation issues in the Lidsey Catchment "The applicant is advised to adopt, where appropriate, the measures in the table "Practical measures to reduce the potential impacts of development".

Developer should look to protect the public sewerage system from inundation and infiltration, which contribute to flooding in unfavourable conditions.

PLANNING POLICY GUIDANCE

NPPF National Planning Policy Framework

POLICY COMMENTARY

The Development Plan consists of the Arun District Local Plan 2003, West Sussex County Council's Waste and Minerals Plans and Made Neighbourhood Development Plans.

A new local plan is in preparation may be a material consideration when determining Planning Applications. At this stage the Arun District Local Plan 2011-2031 (Publication Version) October 2014 and supporting documents were submitted for independent examination on 30 January 2015. The Examination into the submitted plan was commenced but is currently suspended whilst Arun District Council addresses matters raised by the Inspector.

A number of Main Modifications to the Arun District Local Plan 2011-2031 (Publication Version) October 2014 were approved by the Council on 22nd March 2017 and consultation on these is taking place 10 April 2017 to 5pm on Tuesday 30 May 2017. The Main Modifications should be read alongside the Arun District Local Plan 2011-2031 (Publication Version) October 2014 and where there are changes the Main Modification may also be material consideration to take into account.

Arun District Council's Development Plans:

Paragraph 215 of the NPPF ensures that specific policies in Arun District Local Plan 2003 can carry weight. The weight afforded to the policies with Local Plan policies can be assessed according to their level of consistency of the various policies with the National Planning Policy Framework.

Paragraph 216 of the NPPF confirms that weight can be given to policies in emerging plans from the day of publication. The Council resolved that the policies and maps in the Publication Version of the Local Plan be used are material considerations in the determination of this planning application. The emerging Plan was submitted in January 2015 and the examination is currently suspended. The examination is due to re-commence in summer 2017 following publication of modifications to the Plan.

The policies are published under Regulations 19 and 35 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

The Neighbourhood Development Plan

Where applicable, Neighbourhood Development Plan's (more commonly known as a neighbourhood plan or NDP), once made by Arun District Council, will form part of the statutory local development plan for the relevant designated neighbourhood area and policies within them will be considered in determining planning applications. Made NDP policies will be considered alongside other development plan documents including Arun District Council's Local Plan. Whilst an NDP is under preparation it will afford little weight in the determination of planning applications. Its status will however gain more weight as a material consideration the closer it is towards it being made. Arun District Council will make reference to an NDP when it has, by the close of planning application consultation, been publicised for pre-submission consultation (Reg.14).

Made Plans in Arun District Council's Local Planning Authority Area are: Aldingbourne; Angmering; Arundel; Barnham & Eastergate; Bersted; Bognor Regis; Clymping; East Preston; Felpham; Ferring; Kingston; Littlehampton; Rustington; Walberton; Yapton. The written Ministerial Statement of 13 December 2016 confirms that relevant policies for the supply of housing in Neighbourhood Plans should not be deemed to be out of date where all of the following circumstances arise;

- The NDP has been part of the development plan for 2 years or less or the ministerial statement is less than 2 years old
- The NDP allocates sites for housing
- The Council can demonstrate a three-year supply of deliverable housing sites

Arun District Council will make reference to an NDP when it has, by the close of planning application consultation, been publicised for pre-submission consultation (Reg.14).

DEVELOPMENT PLAN AND/OR LEGISLATIVE BACKGROUND

PLANNING

Section 38(6) of the Planning and Compulsory Purchase Act 2004 states:-

"If regard is to be had to the development plan for the purpose of any determination to be made under the planning Acts the determination must be made in accordance with the plan unless material considerations indicate otherwise."

The proposal is considered to comply with relevant Development Plan policies in that it would have no materially adverse effect on the visual amenities of the locality or the residential amenities of the adjoining properties, nor would it have an adverse impact upon the established character of the surrounding area.

OTHER MATERIAL CONSIDERATIONS

It is considered that there are no other material considerations to warrant a decision otherwise than in accordance with the Development Plan and/or legislative background.

CONCLUSIONS

The application site is situated within the built up area and within established residential area where the principle of development is acceptable subject to compliance with relevant development

plan policy.

The proposed extension would be single storey and would be the same depth and height as the existing L shaped extension, although would extend 2m beyond the side elevation. Planning permission has been granted previously for a rear extension to level off the existing L shaped extension. The side elevation of the extension would be seen from the frontage. The proposed extension would be 3m from the side boundary to the north. Although the current proposal extends the width of the extension beyond the side elevation it is still considered that the proposed extension is in keeping with the character and appearance of the host property and is not considered unduly dominant on the property and when and as such is not considered harmful to character of the wider area.

The proposed extension would be 3m from the boundary with the open land leading to the electricity sub station and therefore has no adverse impact on residential amenity. The extension will have no impact to the adjacent property to the south as it is set behind the existing rear extension. The proposed extension will be 18m from the rear boundary and as such has no impact upon the amenity of occupiers in properties to the rear.

There are no parking implications arising from the proposed development.

In summary, the proposed development is not considered to be visually obtrusive or prominent and would not have an adverse impact on the character and appearance of the host property and the amenity of adjoining occupiers. The proposed development is therefore recommended for approval subject to the following conditions

HUMAN RIGHTS ACT

Human Rights Act:

The Council in making a decision should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as Arun District Council to act in a manner, which is incompatible with the European Convention on Human Rights.

Consideration has been specifically given to Article 8 (right to respect private and family life) and Article 1 of the First Protocol (protection of property). It is not considered that the recommendation for approval of the grant of permission in this case interferes unreasonably with any local residents' right to respect for their private and family life and home, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general interest and the recommendation for approval is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

DUTY UNDER THE EQUALITIES ACT 2010

Duty under the Equalities Act 2010

In assessing this proposal the following impacts have been identified upon those people with the following protected characteristics (age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex or sexual orientation).

The proposal would have a neutral impact on the protected characteristics.

RECOMMENDATION

APPROVE CONDITIONALLY

- 1 The development hereby permitted shall be begun before the expiration of 3 years from the date of this permission.

Reason: To comply with Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 The development hereby approved shall be carried out in accordance with the following approved plans .site plan, block plan, 51/17/02 A, 51/17/04 & 51/17/06A

Reason: For the avoidance of doubt and in the interests of amenity and the environment in accordance with policy GE7 of the Arun District Local Plan.

- 3 The materials and finishes of the external walls of the extension hereby permitted shall match in colour and texture those of the existing building.

Reason: In the interests of amenity in accordance with policies GEN7 and DEV19 of the Arun District Local Plan.

- 4 Development shall not commence until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority.

The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, the recommendations of the SUDS Manual produced by CIRIA.

Winter groundwater monitoring to establish highest annual ground water levels and Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage.

No building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason : To ensure that the proposed development is satisfactorily drained in accordance with policies GEN7 and GEN9 of the Arun District Council Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

- 5 INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any

representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

- 6 **INFORMATIVE:**
No works parallel to the public sewer within 500mm (in plan).
No new soakaways should be located within 5 metres of a public sewer.
Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.
The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".
- 7 **INFORMATIVE:** A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".
- 8 **INFORMATIVE:** It is the responsibility of the developer to make suitable provision for the disposal of surface water. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order
- a Adequate soakaway or infiltration system
 - b Water course
 - c Where neither of the above is practicable sewer
- 9 **INFORMATIVE:** Due to surface water inundation issues in the Lidsey Catchment "The applicant is advised to adopt, where appropriate, the measures in the table "Practical measures to reduce the potential impacts of development". Developer should look to protect the public sewerage system from inundation and infiltration, which contribute to flooding in unfavourable conditions.
