

4th June 2026

Biodiversity Enhancement Statement

Tara
Norton Lane
Norton
PO20 3NH

Improvement Measures

This Statement forms supplementary information for a new Householder Application at the above address. The works are relatively minor in nature and do not increase pressures on the existing biodiversity on the site. As Part of the application, a new bat box and bird box will be installed on the Southern flank wall and in one of the trees on the site respectively. New soft landscaping and planting on the site, though not part of the Planning Application, will also ensure that the existing ecological value and biodiversity of the site will be increased
