

Please see Action Sheet

Simon,
Please see the attached amended landscape plan and management statement (REV H) to incorporate rabbit guards as highlighted and excerpted below.

Whips

1. All whips to be pit planted with rabbit guards as per detail.
2. Soil ameliorants can be premixed with the soil applied or mixed in during planting.
3. Soil ameliorants to consist of an approved compost at 10L per m², and 50g/m² of 10.10.10 NPK slow release fertilizer.

Trees

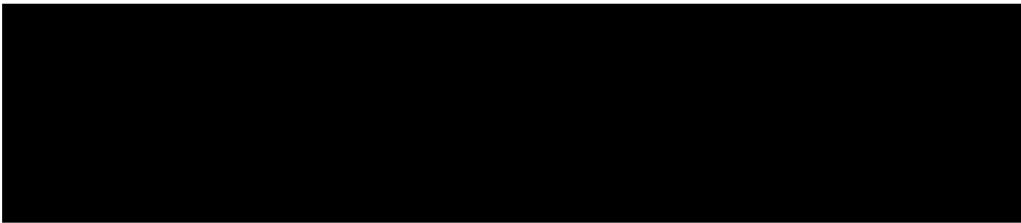

1. All trees to be pit planted as per detail with rabbit guards installed for each tree.
2. Soil ameliorants to consist of an approved compost, at 20L for each feathered tree and 150g/tree of 10.10.10 NPK slow release fertilizer.

I trust this is now to your satisfaction.

Our client is intending to start planting on Monday as submitted concentrating on that area of the boundary through which the site is most visible from Marsh Lane.

Regards,

Eamonn

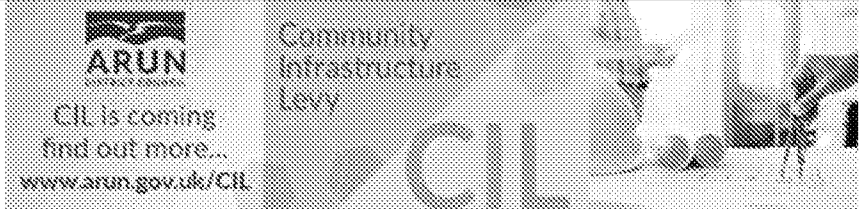

Dear Eamonn,

I hope you are well. Can you advise me when your client expects to commence the agreed planting scheme.

Can you also let me know how the progress is with amending the Landscape Management & Maintenance Statement.

Kind Regards
