Hi Mr Davis

Further to our telephone conversation, please find the comment I placed on the website on 27 November, repeated below:-

"There appear to be various buildings on site that are not included in the current application, that have in the past, been used for housing livestock and I have a concern that they could be used again for this purpose. This would give rise to noise and smell pollution together with unacceptable amounts of flies in a close proximity to the proposed conversion. There is still a large liquid slurry tank close to the proposal which cannot be ideal so close to a new residential unit. The current ditch that is proposed to take the treated sewerage water (ie between Sack Lane and the private road) would appear to be very heavily contaminated from previous farming activities or sewerage from a different source which I feel should be investigated."

If you require any further information, please do not hesitate to contact me.

Kind regards
Colin Chewter
