

Application No: AL/79/20/OUT

Whilst there is no archaeological reason to object to development of this site, it lies in a general area that has been shown to contain deposits of interest. In the circumstances it would be appropriate to require that the archaeological potential of the site be evaluated by trial trenching ahead of development in order to ensure that the significance of anything of interest thus identified might be properly conserved. This process should be secured following a version of standard planning condition ARC1 as follows:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.
