Subject: RE: Planning Consultation on: AL/79/20/OUT

I refer to the above planning application and make the following comments;

Electric vehicle charging points - the following condition should be applied to any permission granted;

Prior to occupation of any of the dwellings, a scheme for the provision of facilities to enable the charging of electric vehicles to serve the approved dwellings shall be submitted to the local planning authority for approval and thereafter implemented in accordance with the approved details and the charge points shall thereafter be retained and maintained in good working condition.

Reason: New petrol and diesel cars / vans will not be sold beyond 2040, and to mitigate against any potential adverse impact of the development on local air quality, in accordance with policy QE DM3 (c) of the Arun Local Plan, the Arun District Council Electric Vehicle Infrastructure Study (November 2017) and the National Planning Policy Framework (NPPF).

Air Quality - the following condition should be applied to any permission granted;

As this is a major application, consideration must be given to air quality issues. As per the National Planning Policy Framework (NPPF) (updated February 2019) air quality should be considered at the design stage and incorporate appropriate and effective mitigation.

The applicant must follow the Air Quality & Emissions Mitigation Guidance for Sussex (2020), available at:

<http://www.sussex-air.net/Reports/SussexAQGuidanceV.12020.pdf>

This countywide adopted guidance states that where a major sized development is proposed a number of checklists should be followed in order to determine the likely impact of the proposed development on air quality. The intention of the guidance is to identify any air quality impacts through an impact assessment and ensure the integration of appropriate mitigation into a scheme at the design stage, so the damage costs on health can be properly mitigated. The air quality impact assessment can follow the procedures contained within the Institute of Air Quality Management (IAQM) Guidance entitled: 'Land-Use Planning & Development Control: Planning For Air Quality' (January 2017), available at:

<http://www.iaqm.co.uk/text/guidance/air-quality-planning-guidance.pdf>

Reason: To protect the amenity of local residents in accordance with Policy QE SP1 of the Adopted Arun Local Plan 2011 – 2031

Contaminated Land – the site previously formed part of the adjacent nursery and therefore has the potential to be contaminated with oil, pesticides, herbicides etc. The following condition should therefore be applied to any permission granted;

Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

1. A 'Preliminary Risk Assessment' which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; and potentially unacceptable risks arising from contamination at the site.
2. A 'Site Investigation Scheme', based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.
3. Based on the 'Site Investigation Scheme' and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.
4. A 'Verification Report' providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan

to demonstrate that the site remediation criteria have been met. The report shall also include a 'long-term monitoring and maintenance plan' for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To protect the amenity of local residents in accordance with Policy QE DM4 of the Adopted Arun Local Plan 2011 – 2031

Construction - the following conditions should be applied to any permission granted in order to protect the residential amenity of nearby residents;

- No development shall take place, including any works of demolition, until a Construction Management Plan has been submitted to, and approved in writing by, the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters:-
 - a) An indicative programme for carrying out of the works;
 - b) Details of the arrangements for public engagement / consultation both prior to and continued liaison during the construction works;
 - c) Measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s);
 - d) Details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination;
 - e) The parking of vehicles of site operatives and visitors;
 - f) Loading and unloading of plant and materials, including permitted times for deliveries;
 - g) Storage of plant and materials used in constructing the development;
 - h) The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
 - i) The provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulations Orders);
 - j) Measures to control the emission of dust and dirt during construction;
 - k) A scheme for recycling / disposing of waste resulting from demolition and construction works i.e. no burning permitted.

Reason: To protect the amenity of local residents in accordance with Policy QE SP1 of the Adopted Arun Local Plan 2011 – 2031

- No construction / demolition activities shall take place, other than between 08:00 to 18:00 hours (Monday to Friday) and 08:00 to 13:00 hours (Saturday) with no 'noisy' work on Sunday or Bank Holidays

Reason: To protect the amenity of local residents in accordance with Policy QE SP1 of the Adopted Arun Local Plan 2011 – 2031

Lighting - the following condition should be applied to any permission granted;

Details of the proposed lighting scheme for the development shall be provided and approved by the Local Planning Authority before installation.

Due to the relative proximity of existing residential premises there is the potential for the development to cause a loss of amenity as a result of light glare / creep / bleed.

Light intrusion into residential windows shall not exceed 10 Lux between 07:00 and 21:00 hours and 5 Lux between 21:00 and 07:00 hours, measured as Vertical Illuminance (EV) normal to glazing. The Sky Glow (Upward Light Ratio) shall not exceed 5.0%

Prior to the commencement of the development, details of the external lighting of the site shall be submitted to and approved in writing by the Local Planning Authority. These details shall include the predictions of both horizontal illuminance across the site and vertical illuminance affecting immediately adjacent receptors. The lighting installation shall comply with the recommendations of the Institution of Lighting Professionals (ILP) "Guidance Notes for the Reduction of Obtrusive Light" (GN01:2011)

Prior to occupation, the predicted illuminance levels shall be tested by a competent person to ensure that the illuminance levels agreed in the scheme are achieved. Where these levels have not been met, a report shall demonstrate what measures have been taken to reduce the levels to those agreed within the application scheme.

The approved installation shall be maintained and operated in accordance with the approved details unless the Local Planning Authority gives its written consent to a variation.

Reason: To protect the amenity of local residents in accordance with Policy QE DM2 of the Adopted Arun Local Plan 2011 – 2031

Noise – the site is adjacent to a nursery and in similar cases noise from mechanical plant and vehicle movements have been known to disturb neighbours. **The following condition should therefore be applied to any permission granted to ensure that a suitable noise assessment is carried out;**

Prior to the commencement of the development hereby approved, a scheme to demonstrate that the internal noise levels within the residential units will conform to the "Indoor ambient noise levels for dwellings" guideline values specified within Table 4 under section 7.7.2 of BS 8233:2014.

Details shall be compiled by a competent acoustician on sound insulation and noise reduction for buildings and shall be submitted to and approved in writing by the Local Planning Authority. The scheme should take into account the correct number of air changes required for noise affected rooms. The works specified in the approved scheme shall then be carried out in accordance with the approved details prior to occupation of the premises and be retained thereafter.

Reason: To protect the amenity of local residents in accordance with Policy QE DM1 of the Adopted Arun Local Plan 2011 – 2031

Informative

The granting of this planning permission does not in any way indemnify against statutory nuisance action being taken should substantiated complaints within the remit of the Environmental Protection Act 1990 be received. For further information please contact the Environmental Health Department on (01903) 737555

Joanne Lewis

Please note that I work part time and my working hours are usually 09.30 – 14.45 Tuesday – Friday.

Should you have any comments to make, these should be sent by replying to this email by 26th November 2020 . You can also monitor the progress of this application through the Council web site:

www.arun.gov.uk/planning.

The application will be determined having regard to the development plan policies (if any are relevant) and other material considerations. The development plan can be accessed via the website <https://www.arun.gov.uk/development-plan> as can the the leaflet how to respond to planning applications <https://www.arun.gov.uk/planning-application-comments> which deals with material planning considerations.

Please be aware that any comments you may make will be available on our website so please do not insert personal details or signatures on your reply.

Should the application go to appeal the Planning Inspectorate will publish any comments made to the Council on their website: <https://www.planningportal.co.uk/info/200207/appeals> but they will protect personal details.

In the absence of a reply within the period stated, I shall assume that you have no observations to make

Yours sincerely
