19.9.16

No AL/83/16

I am writing to express my concern and objections to the proposed building of houses on the field adjacent to Barnside planning application No AL/83/16 as the NDP for Aldingbourne was for 30 houses has been exceeded and stands at over 320 houses plus permission has also given for up to 79 houses in to Hook Lane entrance through Oak Dene. Hook Lane is subject to flooding it is very narrow in places with dangerous sharp bends the road is in bad repair with large sections of the edges broken completely. The speed and weight is ignored as there is no way of enforcing it. The lane is used as a rat run my daughter and I were only just missed on one bend by a large van taking a corner too fast this happens all the time and has caused several accidents. If permission for the houses is given this could mean plus the motor vehicles from Oak Dene up to 175 the lane is not capable for this amount of traffic as there is no bus service into Bitchester and the very few into Bognor which means they will use their cars. The building of these houses will mean cutting down the established hedge which borders the lane as the houses will front the edge of the lane, this will alter the rural aspect of the lane, I believe this settlement boundary of Westergate.

P. T. O.

Further concerns the local doctors surgery was built to care for 7000 patients is over ~~sub~~ oversubscribed by 4000 is being overwhelmed and is struggling to cope I have it on good authority that there are no plans to or money to expand now or in the near future. The local school is always oversubscribed.
