Subject: Application AL/83/16/OUT

Dear Mr Davis,

I would like to register my objection to the above proposed development for the following reasons:

This development would damage the rural nature of Hook Lane. The field itself hosts protected species i.e. bats and great crested newts and these habitats would be irrevocably damaged despite any new hedgerow planting. The ditches and soft verges of this stretch of Hook Lane would be altered which would increase flooding risk.

This is a narrow lane and the proposed footpaths would encroach even further into the available road width. The stretch of Lane in question is narrow and windy and the increase in traffic at this point would increase the level of danger that already exists for accidents to pedestrians, motorists, cyclists and animals, particularly horses and dogs.

At peak times the lane would be overburdened with traffic and this is detrimental to residents and wildlife.

Although the number of proposed houses has been reduced, the objections raised for the previous planning application are all still valid and I refer you back to these to reinforce this objection.

Many thanks

Alison Martin
