

Town & Country Planning Act 1990 (as amended)
Town & country Planning (Development Management
Procedure) (England) Order 2015 - Article 5
Application for Outline Consent
DECISION NOTICE

Application Ref: AL/83/16/OUT

1 To Addressee

Enplan
 10 Upper Grosvenor Road
 Tunbridge Wells

TN1 2EP

2 Site Address

Land south & west of Barnside
 & east of pond

3 Description of Development

Outline application with all matters reserved for residential development of up to 8No. dwellings & associated works including access, landscaping & open space. This application is a Departure from the development plan. Resubmission of AL/8/16/OUT

In pursuance of their powers under this Act and related Orders and Regulations the Council **PERMIT** this development to be carried out in accordance with the application and plans and subject to compliance with the following conditions and Section 106 Agreement.

- 1 The permission hereby granted is an outline permission under s92 of the Town and Country Planning Act 1990 (as amended) and an application for the approval of the Local Planning Authority to the following matters must be made not later than the expiration of 3 years beginning with the date of this permission:-

- (a) Layout;
- (b) Scale;
- (c) Appearance;
- (d) Access;
- (e) Landscaping.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 2 The development hereby permitted shall be begun either before the expiration of 5 years from the date of this permission, or before expiration of 2 years from the date of approval of the last of the reserved matters to be approved, whichever is the later.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 3 The development hereby approved shall be carried out in accordance with the following approved plans:

Site Location Plan as Existing ref 1265-X01 Rev C;
 Topographical Survey as Existing & Demolition ref 1265-X02 Rev C;
 Illustrative Site Layout as Proposed ref 1265-P11 Rev F;
 Drainage Strategy ref 15074-01 Rev B;
 Tree Protection Plan Phase 1 ref B/1030/16; and
 Tree Protection Plan Phase 2 ref B/1030/16.

Reason: For the avoidance of doubt and in the interests of amenity and the environment in accordance with policy GEN7 of the Arun District Local Plan.

- 4 No development shall take place, including any works of demolition, until a Construction Management Plan has been submitted to and approved in writing by the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters,

- the anticipated number, frequency and types of vehicles used during construction,
- the method of access and routing of vehicles during construction,
- the parking of vehicles by site operatives and visitors,
- the loading and unloading of plant, materials and waste,
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- measures to control the emission of dust and dirt during demolition and construction, lighting for construction and security.

Reason: In the interests of highway safety and the amenities of the area in accordance with Arun District Local Plan policy GEN7 and the National Planning Policy Framework. It is considered necessary for this to be a pre-commencement condition because the purpose of the condition is to mitigate the impact of construction.

- 5 No development shall commence until such time as revised plans and details incorporating the recommendations given in the Stage 1 Road Safety Audit and accepted in the Designers Response have been submitted to and approved in writing by the Local Planning Authority in consultation with the Highway Authority.

Reason: In the interests of road safety and in accordance with Arun District Local Plan policy GEN7 and the National Planning Policy Framework. It is considered necessary for this to be a pre-commencement condition because road safety is at the heart of the planning permission.

- 6 Development shall not commence until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority.

The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, the recommendations of the SUDS Manual produced by CIRIA.

Winter groundwater monitoring to establish highest annual ground water levels and Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage.

No building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies GEN7 and GEN9 of the Arun District Council Local Plan. It is considered necessary for this to be a pre-commencement condition because it would not be possible to implement a surface drainage scheme once development had commenced.

- 7 The development shall not proceed until formal consent has been approved in writing from the Lead Local Flood Authority (WSCC) or its agent (ADC) for the discharge of any flows to watercourses, or the culverting, diversion, infilling or obstruction of any watercourse on the site.

Any discharge to a watercourse must be at a rate no greater than the pre-development run off values.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies GEN7 and GEN9 of the Arun District Council Local Plan. It is considered necessary for this to be a pre-commencement condition because surface water drainage goes to the heart of the planning permission.

- 8 Development shall not commence until full details of the maintenance and management of the SuDS system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include (a) details of financial management of the site including arrangements made in the event that the management company (or any subsequent management company) is no longer able to fulfil its duties; and (b) arrangements for the replacement of major components at the end of the manufacturers recommended design life.

Reason: To ensure the efficient maintenance and on-going operation of the SuDS system and to ensure the best practice in line with guidance set out in 'The SuDS Manual' CIRIA publication ref: C753 Chapter 32. It is considered necessary for this to be a pre-commencement condition because surface water drainage goes to the heart of the planning permission.

- 9 The development layout shall not be agreed until such time that arrangements for the future access and maintenance of any watercourse or culvert (piped watercourse) crossing or abutting the site has been submitted and approved in writing by the Local Planning Authority.

No construction is permitted, which will restrict current and future land owners from undertaking their riparian maintenance responsibilities of any watercourse on or adjacent to the site.

Reason: To ensure that the duties and responsibilities, as required under the Land Drainage Act 1991, and amended by the Flood and Water Management Act 2010, can be fulfilled without additional impediment following the development completion. It is considered necessary for this to be a pre-commencement condition because surface water drainage goes to the heart of the planning permission.

- 10 Construction of the development shall not commence unless and until details of the proposed means of foul sewerage disposal has been submitted to, and approved in writing by, the Local Planning Authority in consultation with Southern Water. The scheme as approved shall be implemented prior to the first occupation of the dwellings and maintained in good working order.

Reason: To ensure that the proposed development has a satisfactory means of disposing of foul sewerage in accordance with policy GEN9 of the Arun District Council Local Plan. It is considered necessary for this to be a pre-commencement condition because it would not be possible to implement a foul drainage scheme once development had commenced.

11

Prior to the commencement of development approved by this planning permission (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved, in writing, by the local planning authority:

1. A preliminary risk assessment which has identified:

- all previous uses
- potential contaminants associated with those uses
- a conceptual model of the site indicating sources, pathways and receptors
- potentially unacceptable risks arising from contamination at the site.

2. A site investigation scheme, based on (1) to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. The site investigation results and the detailed risk assessment (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

4. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the express consent of the local planning authority. The scheme shall be implemented as approved.

Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun District Local Plan policy GEN7. It is considered necessary for this to be a pre-commencement condition because contamination goes to the heart of the planning permission.

12

No development including site access, demolition or associated construction activities, shall take place on the site unless and until the tree retention & protection scheme as contained within the submitted Arboricultural Method Statement by Beechdown (Ref B/0130/16) (September 2016) has been implemented for all retained trees including trees whose root protection areas fall within the construction zone from neighbouring land. All tree protection works shall be in accordance with BS 5837:20012 "Trees in relation to construction"

Reason: To ensure the retention and maintenance of trees and vegetation which are an important feature of the area in accordance with policy GEN7 of the Arun District Local Plan. It is considered necessary for this to be a pre-commencement condition because otherwise trees might be harmed during the construction process.

- 13 Upon completed construction of the SuDS System but prior to occupation of any part of the scheme, the owner or management company shall either provide the local planning authority with an updated copy of the management manual incorporating any changes as a result of construction/implementation or confirm in writing that no changes are required to the manual.
- No further changes shall be made to the approved SuDS Maintenance & Management Plan/Regime including the management company responsible or the financial arrangements between the owners of the dwellings & the management company other than with the written consent of the Local Planning Authority.
- The owner or management company shall thereafter strictly adhere to and implement the recommendations contained within the manual to ensure that the system is maintained in perpetuity.
- Reason: To ensure the efficient maintenance and on-going operation of the SuDS system and to ensure the best practice in line with guidance set out in 'The SuDS Manual' CIRIA publication ref: C753 Chapter 32.
- 14 No part of the development shall be first occupied until such time as the vehicular access has been constructed in accordance with plans and details submitted to and approved in writing by the Local Planning Authority.
- Reason: In the interests of road safety in accordance with policy GEN7 of the Arun District Local Plan and the National Planning Policy Framework.
- 15 No part of the development shall be first occupied until visibility splays of 2.4 metres by 47 to the north and 2.4 by 49 metres to the south have been provided at the proposed site vehicular access onto Hook Lane in accordance with the approved planning drawings. Once provided the splays shall thereafter be maintained and kept free of all obstructions over a height of 0.6 metre above adjoining carriageway level or as otherwise agreed.
- Reason: In the interests of road safety in accordance with policy GEN7 of the Arun District Local Plan and the National Planning Policy Framework.
- 16 If during development, contamination not previously identified, is found to be present at the site then no further development (unless otherwise agreed in writing with the Local Planning Authority) shall be carried out until the developer has submitted, and obtained written approval from the Local Planning Authority for an amendment to the remediation strategy detailing how this unsuspected contamination shall be dealt with.
- Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun District Plan policy GEN7.

- 17 Prior to occupation of any part of the permitted development, a verification report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to and approved, in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. It shall also include any plan (a "long-term monitoring and maintenance plan") for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification plan, and for the reporting of this to the local planning authority.

Reason: To protect the environment and prevent harm to human health by ensuring that the remediated site has been reclaimed in an appropriate standard in accordance with Arun District Local Plan policy GEN7.

- 18 The development must be carried out in accordance with the recommendations and mitigation measures as set out within sections 4.0 and 5.0 of the FPCR Ecological Appraisal dated July 2016 and also in accordance with the following additional measures as set out in the comments of the Council's Ecologist:

(1) Any works to the trees or clearance of vegetation on the site shall only be undertaken outside of the bird breeding season which takes place between 01 March and 01 October. If works are required within this time then an ecologist shall be instructed to check the site at least 24 hours prior to any works taking place.

(2) Demolition of the outbuildings shall be undertaken by hand with careful stripping of the internal and external roof space in the presence of a suitably qualified ecologist. If any bats are found then all works must stop and Natural England should be consulted. This demolition work should only take place between October and March.

The enhancements and mitigation measures shall be retained and thereafter maintained as fit for purpose.

Reason: In accordance with Arun District Local Plan policy GEN29 and the National Planning Policy Framework.

- 19 No external lighting shall be installed on site until plans showing the type of light appliance, the height and position of fitting, illumination levels and light spillage have been submitted to and approved in writing by the Local Planning Authority. The scheme should also minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding. The lighting approved shall be installed and shall be maintained in accordance with the approved details.

Reason: In the interests of the amenities of the area, the site biodiversity (particularly in respect of bats) and to minimise unnecessary light spillage outside the development site in accordance with Policies GEN7, GEN29 & GEN33 of the Arun District Local Plan.

20

If any root structures with a diameter over 25mm are exposed during the excavation of the foundations for the new dwelling then these should be retained unless otherwise agreed in writing with the Local Planning Authority. Any removal of roots over 25mm in diameter that has been agreed with the Local Planning Authority shall then be carried out under the supervision of the Council's Arboricultural Officer.

Reason: To ensure the retention and maintenance of trees and vegetation which are an important feature of the area in accordance with policy GEN7 of the Arun District Local Plan.

INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

INFORMATIVE: The applicant is advised to enter into a Section 59 Agreement under the 1980 Highways Act, to cover the increase in extraordinary traffic that would result from construction vehicles and to enable the recovery of costs of any potential damage that may result to the public highway as a direct consequence of the construction traffic. The Applicant is advised to contact the Highway Officer (01243 642105) in order to commence this process.

INFORMATIVE: The applicant is advised to enter into a legal agreement with West Sussex County Council, as Highway Authority, to cover the off-site highway works. The applicant is requested to contact The Implementation Team Leader (01243 642105) to commence this process. The applicant is advised that it is an offence to undertake any works within the highway prior to the agreement being in place.

INFORMATIVE: A formal application for connection to the public sewerage system is required in order to service this development. Please contact Southern Water, Southern House, Sparrowgrove, Otterbourne, Hampshire, SO21 2SW (Tel 033 0303 0119) or www.southernwater.co.uk.

INFORMATIVE: This notice does not give authority to destroy or damage a bat roost or disturb a bat. Bat species are protected under Section 39 of the 1994 Conservation (Natural Habitats etc) Regulations (as amended), the 1981 Wildlife and Countryside Act (as amended) and the 2000 Countryside and Rights of Way Act. It is illegal to damage or destroy any bat roost, whether occupied or not, or disturb or harm a bat. If you are aware that bats roost in a tree(s) for which work is planned, you should take further advice from Natural England (via the Bat Conservation Trust on 0845 1300228) or an ecological consultant before you start. If bats are discovered during the work, you must stop immediately and contact Natural England before continuing.

INFORMATIVE: The applicant should note that under Part 1 of the Wildlife and Countryside Act 1981, with only a few exceptions, it is an offence for any person to intentionally take, damage or destroy the nest of any wild birds while the nest is in use or being built. Birds nest between March and September and therefore removal of dense bushes, ivy or trees or parts of trees etc. during this period could lead to an offence under the act.

INFORMATIVE: This decision has been granted in conjunction with a Section 106 legal agreement relating to a contribution of £8,000 to be spent on new play equipment for the open space at Olivers Meadow, Aldingbourne.

Neil Crowther
Group Head of Planning

Case Officer: Mr S Davis

Date of Decision:

15 March 2018

Arun District Council
The Arun Civic Centre
Maltravers Road
Littlehampton
West Sussex BN17 5LF

IT IS IMPORTANT THAT YOU READ THE NOTES ATTACHED TO THIS DOCUMENT

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

If this is a decision on a planning application relating to the same or substantially the same land and development as is already the subject of an enforcement notice, and you want to appeal against this planning application decision, then you must do so within 28 days of the date of this notice.

If an enforcement notice is served relating to the same or substantially the same land and development as in your application and you want to appeal against this planning application decision, then you must do so within 28 days of the date of service of the enforcement notice, or within 12 weeks of the date of this notice, whichever period expires earlier.

Otherwise, if you want to appeal against this decision then you must do so within 6 months of the date of this notice.

Appeals must be using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <http://acp.planninginspectorate.gov.uk>

The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

PURCHASE NOTICES

If either the local planning authority or the Secretary of State refused permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Council (that is, where the land is situated in a National Park, the National Park authority for the Park, or in any other case the district council in whose area the land is situated).

This notice will require the Council to purchase the owner's interest in the land in accordance with the provisions of Chapter 1 of Part VI of the Town & Country Planning Act 1990.

Please note that this decision notice only relates to matters under the Planning Acts and does not give consent under any other legislation that may apply to the development. You will need to carry out your own checks to determine whether any other consents or permissions are required. For example, the Building Regulations are likely to apply to most developments, and a Highways Licence may be required from West Sussex County Council for any development within the public highway (including the placing of skips on highway land).
