

Lidsey Drainage Impact Assessment

The Coach House

Norton Lane

Chichester

PO20 3NH

July 2025

Statement

The proposed development included no additional or new drainage connections. No additional wash facilities are proposed.

The proposal results in no additional bedrooms and does not in itself result in a population increase for use of water within the Lidsey Drainage Catchment.

As such, no additional water management facilities are required as part of this proposal to reduce the development impact in the Lidsey Drainage Impact Area.
