Dear Richard,

Thanks for your email.

The purpose of the condition is principally to ensure that the lighting is bat friendly. Typically lighting should therefore either be shielded or face downwards.

Kind Regards

Simon J Davis MRTPI | Principal Planning Officer, Planning Department, Directorate of Place, Arun District Council |

Good morning Simon

Sorry unable to speak to you again yesterday afternoon following the Planning Committee's unanimous vote in favour of our application.

Thank you very much for all your hard work in securing this – it was very much appreciated.

Re the external lighting, there have been flood lights around the building suitably angled down since the building was first put up – no complaints received!

Will need to provide bulk head type lights probably attached to the two side fences – would need to be fairly close to the top of the fence say 1.8M high [2M close boarded fence height] – they are only on after dark when shop in use and current lights have [I think] a slight delay going off after the shop light main switch is turned off to assist locking up [otherwise it's pitch black out there!]

Await your guidance and thanks again for all your perseverance on this project

Kind regards

Richard
