Dear Amy

Thank you for your email. I confirm that all foul drainage will be connected to the existing foul drainage mains sewer on site and no alteration is required to the existing connection.

Regards

David/James,

Further to your planning/LB submission – given the site is located within the Lidsey Catchment Area, which is prone to drainage issues, our validations checklist requires that applicants provide written confirmation that the foul water drainage from development will connect to the mains sewer – please can you email me by next week to confirm any foul water drainage from the converted annexe and new garage building would connect to the mains sewer?

Thank you,

Amy
