Group of one oak and two ash trees located offsite and have been subject to significant structural failures (appear to be repeated storm damage related). Oak tree completely structurally compromised and both ash trees show signs of vitality decline and weakened structural integrity. Direct contact with legal landowner is advised to progress prudent management decisions to establish acceptable levels of risk.

Special precautions in accordance with SGNs 8 and 12 to be taken when removing existing structures and establishing soft landscaping.

Special precautions in accordance with SGNs 8 and 12 to be taken when removing existing surfacing (retained as ground protection during main phase of development) and establishing soft landscaping.

Existing hard surfaced access route to remain in place and will provide suitably robust form of ground protection.
