Proposed Workshop & Garden Store
Norton House Norton Lane Norton

DESIGN & ACCESS STATEMENT

Norton House is situated at the north end of Norton Lane in the hamlet of Norton and within the Conservation Area designated as such in March 1998.

Consent for a three bay carport was granted in 97/98 and it is now the intention to extend the building in an 'L' shape to provide a small workshop, garden store and covered log area.

The new building will be constructed using materials to match the garage building – wide tanalised boarding and natural slate on the roof.

Disabled access to the workshop is from the existing tarmac hard-standing in front of the garages or for the garden store is from the lawn on the garden side.
