Hello,

This application is flawed in many ways. I have spoken with my neighbours in Meadow Way and they, like me had no notification of this application! Had there been, the application case file would have been filled with objections. Who wants to live next to a 15m 5G mast? This is clear evidence that the application was not delivered or made clear to local residence. In addition, the application has very misleading errors.

My house is adjacent to the mast; 3 Meadow Way and is ~20m from the proposed mast. My garden is only 2m from the base of the mast! I will never be able to sell my property, neither will the surrounding properties in Meadow Way; Nos 31, 32, 1, 2, 4 and properties across the A29. This is a devastating decision for me and other residence and I will be seeking legal advice on how this application was granted and consulting with national media.

There is increasing evidence from experts that say exposure to the electromagnetic fields produced by 5G masts is detrimental to human health, wildlife, plant life and insects. We have strived over many years to encourage bees into our garden and have been rewarded by returning bubble bee colonies. 5G masts create issue for bees and the jury is still out on whether it affects bats.

Long term exposure to 5G masts is still unknown and Arun council is gambling with my life! There are plenty of wide-open spaces to erect a phone mast, why is it outside my home?

In conclusion, I will fight to halt the installation of this mast and hold Arun council responsible for my life, my loss of estate revenue, our eco system and the disgraceful impact aesthetically on our village.
