Many thanks for your contact.

I have no problem with including obscured glazing to the front bedroom west facing window as I can provide a necessary Building Regulations 'Means of Escape' casement opening to the front window frame.

Would you prefer that I mark it on the plans or will you just place a Condition on the approval document.

Dear Mr Butcher,

I am writing in relation to AW/117/19/HH at 113 Rose Green Road.

My manager and I have concerns about the front bedroom window to the western dormer. As the dwelling sits forward of the neighbouring property, we believe there is potential for views into the front windows of the yellow house to the west.

I understand it is not ideal to have an obscured bedroom window and therefore I write to see if you propose having a fan light window with it obscured to height of 1.7m or alternatively if it can be re-sited at all.

Please let me know your thoughts.

Thank you

Amber Willard
