

29/3/21

Exsel Plant

future damage to the building and property.

A reduction in tree size and height would in my opinion only prolong the likelihood of damage for short period of time.

The amenity value of this tree is low with no nests present. The surrounding neighbourhood has a significant number of mature trees and I feel that removal of this sycamore tree would not only remove the possibility of building damage but considerably improve the quality and quantity of light allowed to enter no 1 The Spinney.

If you have any questions or queries please feel free to contact me.

Yours faithfully

Mr. D Bentley
