ARUN DISTRICT COUNCIL:AW/122/06/ 25/05/2006

proposed house
72 The Drive
Aldwick

application no AW122/06

design statement

The proposed house will be sited in the established Craigweil estate.

Craigweil is composed of detached dwellings of single, two and three storeys of widely varying designs finished to a high standard and enjoying well established landscaping.

The applicant has been a hands on builder for 45 years and has a preference for a simple Georgian style house as his retirement home.

Care has been taken to provide traditional detailing with high quality materials appropriate to this type of design.

Window openings are strictly to brick lengths to avoid any cut bricks in the bonding over.

A Redland sand faced red brick with purpose made cut brick arches has been chosen for the construction with natural slates on the roof.

With the foregoing in mind my client is of the opinion that the proposed house should sit well with its neighbours and the estate in general.
