

I am assured by Arun District Council (Nicky Moore – Technical Support Assistant) that as long as the tree is not diseased, there is no requirement for an arboriculturist's report.

As I am not claiming that the tree is diseased and as I have already been granted permission to prune back overhang on two other trees (not at this property) by Arun District Council without the need for an arboriculturist's report, I trust that you will not require one on this occasion.
