Dear Ms Moore,

Further to your letter dated 15th April requesting confirmation of the distance from the side boundary and revised block plan please see attached plan.

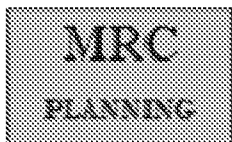

The initial email and attachment found its way into the company email junk box – probably because the attached letter comes as an attachment titled with a string of letters and numbers – I suspect it is treated as spam and junk by many email accounts and so to improve your service it might be an idea to consider how the letters are titled in future to prevent this from arising.

I trust the application may now proceed as quickly as possible.

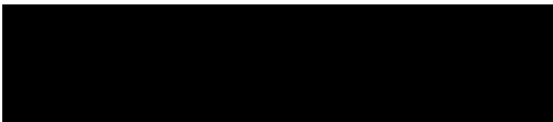

Regards,

Michael
