

TREE SURVEY

This maple tree was surveyed as part of the planning application AW/207/12/T on 24 September 2012. Following a visit from a tree surgeon, we were planning to reduce the tree, but following the agreement of our plans and the subsequently removal and reduction of surrounding trees, we discovered that the maple was disfigured from years of being crushed between two large trees which resulted in it only growing on one side.

When the tree officer from Arun District Council visited she agreed that it would be better to remove it entirely, hence this second planning application.

We intend to replace it with another, healthier maple: 'Acer Palmatum'.
