For the attention of Mr Z Denton - Case Officer

Dear Sir,

Planning Application AW/152/18/TC

I am writing to support this application with however, an important reservation.

Our house lies immediately to the west of Algonquin and our eastern boundary wall runs the full length of that property's rear garden. Algonquin has been unoccupied for many years and for some considerable time there has been little attempt to manage the garden which is now completely overgrown and essentially out of control.

Our concern with this application is that it is not nearly wide enough in scope to cover the work needed to bring the excessive growth of other trees and shrubs not mentioned in the application under control. Many of these are of excessive height and have formed a dense wall of foliage running the full length of the garden such as a number of self-seeded hazels.

While we are able to trim back any growth which comes over the wall, viewed from our garden this is visually intrusive and when we first moved in a year ago blocked sunlight from the back of our house. Limited clearance by the owners and ourselves has reduced this problem but it will re-occur if work on the whole of this garden is not undertaken.

I very much hope that the Planning Department will carry out an on-site inspection in considering this application and if you are able, impose conditions requiring additional work covering trees and shrubs not mentioned in the application.

Yours faithfully,
