

The image displays two architectural elevation drawings of a house. The top drawing, labeled 'Existing', shows a two-story house with a steep gabled roof, a brick chimney, and a brick base. The upper floor is clad in horizontal siding and features a dormer window. The ground floor has a large bay window on the right and several smaller windows. A detached garage is visible on the left. The bottom drawing, labeled 'Proposed', shows the same house after conversion. The main structure remains, but the detached garage on the left has been replaced by a new brick extension, likely the 'Granny Annex' mentioned in the title block. The overall layout and roofline are consistent with the existing drawing.

The image displays two architectural elevation drawings of a residential property. The top drawing, labeled 'Existing', shows a two-story house with a steep gabled roof, a brick ground floor, and a wooden-clad upper floor. A small dormer window is visible on the roof. To the left, there is a single-car garage with a brick wall and a wooden door. The bottom drawing, labeled 'Proposed', shows the same house after a conversion. The main structure remains the same, but the garage area has been converted into a larger room, likely a granny annex, with a new entrance and a larger window. The roofline and upper floor remain unchanged. The drawings are presented in a clean, professional style with clear lines and shading to indicate depth and materials.
