Dear Daniel,

In relation to the above application, I'm afraid I'm a little confused.
This application relates to the discharge of conditions for AW/363/15/OUT, however it seems this outline approval has been superseded by AW/138/17/PL; is this correct?

In relation to the potential contamination on the site, the initial report submitted by Mr. Iain Skinner (Phase I land desk study report and site inspection, undated and no reference available) is not of a standard considered suitable for this Department to consider discharging the associated contamination condition. Furthermore, subsequent reports based on this original submission are therefore likely to have data gaps and will need revising.

Many thanks,

Kate.
