Dear Bob

Tree Works on Craigwell Private Estate

I report on the following trees looked at on my visit last Tuesday the 1st of May.

The following trees (T3 to T7) are additional to the two trees discussed in my previous report Feb this year, which referred to T1, a Large Maple and T2, the large Macrocarpa.

T3, Mature but small in structure Acer negundo. This tree is situated outside No. 11 Wychwood Close. I recommend the easterly lateral branch is pruned back from over the drive by approximately 2 Metres.

T4, Semi Mature /Mature Maple on the corner of Kingsway and Wychwood walk, outside No 47 Kingsway. As requested by the owner of No 47, I feel it would not be unreasonable to crown reduce and reshape this tree by 2.5 Metres in height.

T5 & T6, One Eucalyptus and one Mimosa tree on the south boundary of No. 57 Kingsway. I recommend the two trees are pruned to maintain a balance with the other trees and shrubs in this area. This will involve crown lifting and the reduction in width on both trees. Tipping back by no more than 1.5 to 2 metres and a crown lift of no more than 1 metre.

T7, Mature Oak tree in the Craigwell works compound. This is the Oak covered in Ivy. I recommend the Ivy is cut at the base. I can then review the tree again in a couple of years time.

The above works have been recommended firstly on health and safety grounds and secondly based on my view of good tree management, taking into account the usual verge side environment and its influences. If you require more details they will gladly be provided.

Yours

John
