T7	Silver Birch	300 mm	5.5 metres	Retain

No trees to be removed to make way for the development, all (other than the Beech trees and the Leylandii hedge) are on the applicants property. The only tree to be within influence of the extension is possibly the Silver Birch – T7, however, it is a size, age and position that it is very unlikely.

There are two cropped beech trees in the neighbouring garden that are far enough away to not be an issue, the larger one is around the corner of the house and remote from the extension, the other has been stripped of any real branches.
