Subject: RE: 2 horse chestnuts for felling - 18 Faresmead

Hello Ms Stroud

Iain Fraser has asked me to reply to your email to him. Because the trees in question are dead or dying and dangerous I understand that I no longer need permission to fell the two Horse Chestnut trees in my garden. Therefore I would like to withdraw my recent Application for one Horse Chestnut T397 your ref:TPO/AW/136/10. After which I understand that I can then proceed to felling this together with the other diseased Horse Chestnut T394.

I have accepted John Bentley's quote and I understand that Ian Brewster will check the two trees on the day John Bentley comes to fell them. I would be happy for these two gentlemen to decide the day and time. Please give me a days notice and I will be available. The only day I would like to avoid is November 29.

Many Thanks for your help in this matter.

Ken Woodward

Dear Mr Fraser,

Please find the email from Ian Brewster to myself confirming the trees are dangerous, below.

Kind Regards,

Amelia Stroud

Hi Amelia,

I'm confident with John Bentley's recommendations and can arrange to meet him on the day of the work to issue with the appropriate form. Considering that both trees are in a condition which makes them dangerous the landowner is under a duty to replace both in accordance with Section 205(1) of the T CPA. Does that sound reasonable to you?
