7th June 2015

Dear Bob

Tree Works on Craigweil Private Estate

Further to our visit 26th May, I am pleased to provide the following recommendations for the tree works looked at and discussed with you.

T1, Two X Purple Plum trees outside No 3 Wychwood close. These two trees are in rapid decline and close to dieing. I recommend they are both felled and the stumps removed, so replanting can take place this coming winter.

T2 Semi Mature/Mature Red Oak situated outside the building plot between property No. 8 and 10 Wychwood close. Remove two limbs over the road to reduce the chances of vehicle damage. This will involve creating two pruning cuts no more than 100mm in diameter. The limbs to be removed are approximately 2.5 meters in length.

T3, Maple tree on the corner of Wychwood close. Prune back the lateral spread on the trees south westerly side where it interferes with the street light. This will involve the removal of no more that one meters growth.

T4 Flowering Cherry outside the property being developed on Kingsway. Crown lift the low growth over the road. This will leave a head clearance of 2.5meters. Where the trees canopy is imbalanced I recommend pruning back the Easterly growth by 1.5 Meters.

The above works have been recommended firstly on health and safety grounds and secondly based on my view of good tree management, taking into account the usual verge side environment and its influences. If you require more details they will gladly be provided.

Yours sincerely
