

4 OAK TREES WITH TPO ON THEM

THIS IS A RUN OFF DITCH

TO BE PRUNED

OUR GARDEN

We need work carried out on Tree No 4 that is in our garden. Tree needs pruning as high winds have caused several branches to break off when in leaf. Some of these nearly hit us. Tree surgeon recommended cutting some back by 1 metre to 1 1/2 metres maximum to alleviate stress on tree as it grows out at quite a bad angle.
