7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below: tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

- T1-Eucalyptus - reduce height by 40% - Branches are overhanging adjoining owners house (81 The Fairway) and almost touching thatched roof
T2-Robinia - reduce height by 30% - to mitigate brittle branches breaking due to exposed location.
T3 Sequoia - reduce crown around by 2m to keep size of tree within reasonable size due to proximity to houses either side
T4-Catalpa - reduce crown around by 1.5 m to keep size within reasonable size due to proximity to houses either side and mitigate wind damage.
T5-Magnolia - trim branches that are overhanging neighbors roof and gutter

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.
