

Application for tree works: works to trees subject to a tree preservation order
(TPO) and/or notification of proposed works to trees in a conservation area.
Town and Country Planning Act 1990

Publication of applications on planning authority websites.

Please note that the information provided on this application form and in supporting documents may be published on the Authority's website.
If you require any further clarification, please contact the Authority's planning department.

1. Applicant Name, Address and Contact Details

Title:	Mr	First Name:	Nathan	Surname:	Crossley
Company name:					
Street address:	9				
	Ripon Gardens				
Town/City:	ALDWICK				
Country:					
Postcode:	PO21 3RF				
Are you an agent acting on behalf of the applicant?	☐				

2. Agent Name, Address and Contact Details

No Agent details were submitted for this application

3. Trees Location

Please provide the address of the site where the tree(s) stands (full address if possible):

House:	9	Suffix:	
House name:			
Street address:	Ripon Gardens		
Town/City:	ALDWICK		
Postcode:	PO21 3RF		

If the location is unclear or there is not a full postal address, either describe as clearly as possible where it is (for example, 'Land to rear of 12 to 18 High Street' or 'Woodland adjoining Elm Road') or provide an Ordnance Survey grid reference:

Easting:	491215
Northing:	99331

Description:

4. Trees Ownership

Is the applicant the owner of the tree(s)?

☒ Yes ☐ No

5. What Are You Applying For?

Are you seeking consent for works to a tree(s) subject to a TPO?

☒ Yes ☐ No

Are you wishing to carry out works to tree(s) in a conservation area?

☐ Yes ☒ No

6. Tree Preservation Order Details

If you know which TPO protects the tree(s) enter its title or number below

TPO Reference: TPO/AW/61/10

TPO Reference: BOGNOR NO.2

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Seeking permission to remove/fell 1 No. Quercus Sp. (Oak)

- Requesting not to replant due to heavy competition/shading from existing mature trees in neighbours boundary and close proximity to garage studio where self-employed work is undertaken.

Reasons for seeking permission given below.

Poor specimen oak tree with low amenity value.

Oak (approx. 50ft) showing signs of decline/dieback. Pale leaves, sparse crown with minor stress growth from dormant buds and major dead wood within crown. Main crown begins approximately 30ft from ground where lowest limbs are partly formed of epicormic growth. Small amount of stress growth from dormant buds present on lower major stems where healthy limbs are absent.

Major cavity present on southern aspect of main trunk spanning approximately 4ft upward from ground. 4th wall of CODIT not present, potential 'rams horn' (inward curling growth of wound wood) forming/developing.

Divides in to 2 major stems at approximately 4ft. from ground directly above the previously mentioned cavity. Union of major stems does not appear unhealthy but failure could occur due to weight of both stems causing heavy stresses in different directions directly above mentioned cavity.

Patchy discoloured bark in places on lower main trunk.

Deterioration of bark at ground level affecting cambium underneath in places.

Tree is close enough to surrounding buildings and living areas to cause harm or extensive damage should failure occur.

Seeking permission to remove/fell 1 No. Acer Sp. (Sycamore)

- to be replanted with native species, field maple (Acer campestre), next to existing tree, on side furthest from garage studio in rear garden and trees within neighbours boundary to allow space for new tree to establish good form and develop in to a healthy specimen.

7. Identification Of Tree(s) And Description Of Works

Reasons for seeking permission given below.

Sycamore (approx. 25-30ft) poor specimen tree with low amenity value.
Dense crown with crossing and rubbing branches throughout, formed highly of epicormic growth with few healthy natural branch unions/points of attachment.
Minor defect on main trunk caused by washing line from a previous home owner and many small cavities developing within crown.

Seeking permission to fell and replace mixed conifer hedge with low amenity value, that has begun to revert back to individual trees at front of house with better maintained hedge comprising of native species - Beech (*Fagus sylvatica*) and Copper beech (*Fagus sylvatica purpurea*)

8. Trees - Additional Information

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

For works to trees covered by a TPO

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

1. **Condition of the tree(s)** - e.g. it is diseased or you have fears that it might break or fall:

If YES, you are required to provide written arboricultural advice or other diagnostic information from an appropriate expert.

☒ Yes ☐ No

2. **Alleged damage to property** - e.g. subsidence or damage to drains or drives.

If YES, you are required to provide for:

☐ Yes ☒ No

Subsidence

A report by an engineer or surveyor, to include a description of damage, vegetation, monitoring data, soil, roots and repair proposals. Also a report from an arboriculturist to support the tree work proposals.

Other structural damage (e.g. drains, walls and hard surfaces)

Written technical evidence from an appropriate expert, including description of damage and possible solutions.

Documents and plans (for any tree)

Are you providing additional information in support of your application?

☒ Yes ☐ No

If Yes, please provide the reference numbers of plans, documents, professional reports, photographs etc in support of your application:

Seeking permission to remove/fell 1 No. Quercus Sp. (Oak)

- Requesting not to replant due to heavy competition/shading from existing mature trees in neighbours boundary and close proximity to garage studio where self-employed work is undertaken.

Reasons for seeking permission given below.

Poor specimen oak tree with low amenity value.

Oak (approx. 50ft) showing signs of decline/dieback. Pale leaves, sparse crown with minor stress growth from dormant buds and major dead wood within crown. Main crown begins approximately 30ft from ground where lowest limbs are partly formed of epicormic growth. Small amount of stress growth from dormant buds present on lower major stems where healthy limbs are absent.

Major cavity present on southern aspect of main trunk spanning approximately 4ft upward from ground. 4th wall of CODIT not present, potential 'rams horn' (inward curling growth of wound wood) forming/developing.

Divides in to 2 major stems at approximately 4ft. from ground directly above the previously mentioned cavity. Union of major stems does not appear unhealthy but failure could occur due to weight of both stems causing heavy stresses in different directions directly above mentioned cavity.

Patchy discoloured bark in places on lower main trunk.

8. Trees - Additional Information

Deterioration of bark at ground level affecting cambium underneath in places.

Tree is close enough to surrounding buildings and living areas to cause harm or extensive damage should failure occur.

Seeking permission to remove/fell 1 No. Acer Sp. (Sycamore)

- to be replanted with native species, field maple (*Acer campestre*), next to existing tree, on side furthest from garage studio in rear garden and trees within neighbours boundary to allow space for new tree to establish good form and develop in to a healthy specimen.

Reasons for seeking permission given below.

Sycamore (approx. 25-30ft) poor specimen tree with low amenity value. Dense crown with crossing and rubbing branches throughout, formed highly of epicormic growth with few healthy natural branch unions/points of attachment.

Minor defect on main trunk caused by washing line from a previous home owner and many small cavities developing within crown.

Seeking permission to fell and replace mixed conifer hedge with low amenity value, that has begun to revert back to individual trees at front of house with better maintained hedge comprising of native species - Beech (*Fagus sylvatica*) and Copper beech (*Fagus sylvatica purpurea*)

9. Authority Employee/Member

With respect to the Authority, I am:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

Do any of these statements apply to you?

☐ Yes ☐ No

10. Trees - Declaration

I/we hereby apply for planning permission/consent as described in this form and the accompanying plans/ drawings and additional information. I/we confirm that, to the best of my/our knowledge, any facts stated are true and accurate and any opinions given are the genuine opinions of the person(s) giving them.

Date
