POLICY COMMENTARY

PLANNING
The above policies combine to describe the criteria against which the application will be assessed particularly with regard to visual and residential amenity.

DEVELOPMENT PLAN AND/OR LEGISLATIVE BACKGROUND

PLANNING
Section 38(6) of the Planning and Compulsory Purchase Act 2004 states:-

"If regard is to be had to the development plan for the purpose of any determination to be made under the planning Acts the determination must be made in accordance with the plan unless

material considerations indicate otherwise."

The proposal is considered to comply with relevant Development Plan policies in that it would have no materially adverse effect on the visual amenities of the locality or the residential amenities of the adjoining properties, nor would it have an adverse impact upon the established character of the surrounding area.

OTHER MATERIAL CONSIDERATIONS

It is considered that there are no other material considerations to warrant a decision otherwise than in accordance with the Development Plan and/or legislative background.

CONCLUSIONS

This application seeks approval for a conservatory to be constructed to the rear of the property. An existing conservatory which is currently in a state of disrepair is to be removed in order to accommodate the proposal.

The proposed conservatory is unlikely to make a contribution to the street scene with its location to rear. Further, the conservatory remains consistent with the residential character observed in the estate.

Further, the proposed conservatory would undoubtedly constitute an aesthetic improvement with a brick base measuring approximately 0.6 metres in height and PCVu windows and roof. The proposed conservatory would also occupy a larger footprint than existing by approximately 1.6 metres in its projection, approximately 0.1 metres in width and approximately 0.6 metres in height. However, these augmentations can be accommodated given its single storey nature, a separation distance to the nearest boundary to the east at approximately 7 metres and rear boundary treatment which consists of close boarded fencing at approximately 1.8 metres in height. These factors will assist in mitigating any adverse impact created by the conservatory.

Consequently, it is unlikely that the proposed conservatory will give rise to adverse effects including overlooking, overshadowing, overbearing or loss of privacy.

It is therefore recommended that the application be approved, subject to the conditions set out overleaf.

RECOMMENDATION

APPROVE CONDITIONALLY

1 The development hereby permitted shall be begun before the expiration of 3 years from the date of this permission.
