

Here is the advice from Mr Dafydd Lloyd regarding the two trees subject of this application received 19th June 2015

For the Large *Macrocarpa* in the shrubbery, on the south side, outside number 8 The Kingsway – *suggested actions would include* - the two ‘pegs’ that have been left can be removed without application. However a 1 – 1.5 meter lateral ‘tip’ reduction spanning to the north would require a formal planning application. (I would be happy to approve this as it has been done before)

For the *Malus* tree in verge North East end of Wychwood Walk – *suggested actions would include* – pruning the 2/3 broken limbs facing west over the road, and the removal of the two split limbs due to the extensive damage present. We would need all formal application for all these operations. Again I would be happy to approve this.
