Tree Report

Magnolia

131 Manor Way, Aldwick, PO21 4HL

Dear Sirs,

I am writing to you regarding a Magnolia tree located at the aforementioned address which is covered by a tree preservation order. The tree in question, located in the rear garden of the property has significant dieback from the tips. Additionally there is damage to the cambium layer which encompasses approximately 85% of the base of the tree which has consequently led to extensive decay as well as multiple dead branches. In my professional opinion I don't believe the tree is ever likely to recover and will only continue to deteriorate over time. The tree is very sparse and only has about 15% foliage remaining. I believe the only solution would be to fell the tree and potentially replant another species in its place as I personally see no other viable solution to the problem.

In the event that any further information is required please do not hesitate to contact me.

Yours Faithfully,

Jake Davies

Director and Owner of Round Top Trees Limited
