RECEIVED

23rd June 2015

Dear Sirs, 20% Reduction of Field Maple Tree's

Yesterday we had a tree surgeon Richard Warrington to look at the two large field maple trees in our back garden Mr Warrington told us that the trees need a 20% reduction and that one tree is making the other grow on one side.
It is our intension to do the best for these tree's, we only wish to keep them in good condition we have no wish to have them removed.
Pleased find attached forms as requested, together with a plan showing position of trees, I have enclosed a pictures showing how large the field maples are.

Yours Sincerely

[redacted]

Mrs Angela [redacted]
