Tree Report

Tree Location: Back garden of 1 Wychwood Walk, Aldwick, Bognor Regis, PO21 4DP

Tree Species: English Oak

Estimated age: 80 yr

The reason for this report is the Bark damage on the east side of the lower stem; hart wood is exposed but the condition has not depleted at all in the last 3 years, this missing cambium lower down does mean there is no tension buttress on the east side to counteract the lean of the tree.

The tree has been pruned by what looks like about 30% roughly 5 years ago. I recommend repeating this process to reduce the sail effect on the canopy.

Measurements in meters:

Current

Height: 18 North: 7 East: 4 South: 9 West: 7

Finished after proposed work

Height: 13 North: 5 East: 3 South: 6 West: 5

Kind regards, Luke Bentley.
