Aldwick
PO21 4EQ

13th September 2025

Tree Survey:

(T1): Pedunculate Oak / Quercus Robur.
Height: 15-20m.
Radial spread: 10-15m.
Age class: Late mature.

Outwardly and from the applicant's rear garden/roadside, this tree appears to be in a fine physiological state.

The client wishes to sympathetically reduce the tree, to aesthetically improve the shape of the tree and to reduce the end weight of the branches. Notably the tree has some significant inclusions in the main stem where the crown divides at approximately 8ft high.

This tree deserves careful management due to the amenity value it provides, we can achieve this with remedial works to improve vigour and to prevent any future structural failures.

Yours sincerely

Chris Matthews

All works are carried out in accordance with BS3998:2010 recommendations for tree work. We maintain public liability insurance up to £5 million. Please note that Conservation Area Planning rules or Tree Preservation Orders (TPOs) may be applicable to some trees, requiring local authority consent. We always verify the absence of restrictions prior to commencing any work. If planning permission is necessary, please allow up to eight weeks for a decision.
