Tree Survey:

(T1): Sycamore / Acer Pseudoplatanus.
Height: 15m.
Radial spread: 11m.
Age class: Early-Mature.

Outwardly and from the clients back garden, this tree appears to be in a fine physiological state.

The client has requested for me to carry out a repeat crown reduction to this tree to the previous points. The tree has responded with good vigour from the last time I carried out works ten years ago.

This tree deserves careful management due to the amenity value it provides; we can achieve this with repeat remedial works, which will be required for the remainder of its lifespan to ensure its sustained health and contribution to the landscape.

Yours sincerely

Chris Matthews

All works are carried out in accordance with BS3998:2010 recommendations for tree work. We maintain public liability insurance up to £5 million. Please note that Conservation Area Planning rules or Tree Preservation Orders (TPOs) may be applicable to some trees, requiring local authority consent. We always verify the absence of restrictions prior to commencing any work. If planning permission is necessary, please allow up to eight weeks for a decision.
