YOUR RE:PW/215/14/A

Dear Sirs

Unfortunately I am unable to attend any meetings due to a very nasty fall, hospital etc and am in my 8th week of slow recovery. You mention your empathy with the community be the above but it seems the project was already in process before we were advised so communication is not that good. The council appears to over-ride the opinions of locals. Destroyed a building of over 200 yrs old to install a trash horizon with blaring lights, plus where is the cost of helping small businesses when the local traders will suffer. I for one will not be shopping there but I expect some will.

It is easy to decide what can happen when you do not live here or nearby. But please do not give the impression of thinking of the community. If it were so I could not be writing this letter. We are not convinced.

2

Over the years Bogner Regis has lost quite a few buildings, if not historical at least with character.

Our quiet and delightful little oasis has been ruined.

We all pay our taxes and this is now what we have landed with. Indeed a sad day.

Yours sincerely,

NB I understand the next item on the agenda is traffic calming.
