Garage door

- Roller shutter style

We hope this information and sample attached are of help

Kind regards

Roller Shutter Garage Doors

Electric, insulated roller shutter garage doors from only £995 - fully installed!

The advantages of having a Roller Shutter Garage door are endless. They are perfect for households with limited space outside the garage where there vertical operating action means vehicles can park close to the door.

Roller doors are also ideal for freeing up ceiling space within the garage for lighting & shelving with the simple 'coil up' action, which generally only requires a 300mm coil housing.

Insulation characteristics of the door is another big advantage which again is ideal if for example you have a converted garage which still requires access.

This type of garage door is becoming ever more popular due to this non-intrusive operating action and insulation characteristics making it a serious contender when purchasing a garage door.

Roller Shutter door benefits & options:

Certified High Security Insurance & Police approved Doors

Single & double door sizes
