Subject: AW/217/18/T - errors in EVERY document displayed on the website.

Dear Miss Willard,

Errors in this application have been drawn to the attention of the LPA, except those published on the website for Mr. Vick preferred a public disclosure.

Notwithstanding all this – and the application is supposed to have been validated before being accepted, let alone published – the plan and your ‘systems correspondence’ with the applicant STILL have the site in the headings and text as being 32 The Drive and that simply demonstrates the LPA exacerbating the errors repeatedly submitted by the applicant. Perhaps these may be corrected?

Furthermore, the West Sussex Gazette will, undoubtedly be incorrect – and the notification to the Parish, CAAC etc.

Could accurate Notices be placed in the correct place without causing any harm to trees of my property for otherwise they will be removed and you may then devote attention to my prosecution and waste more time!

Whatever you do, please be sure to follow the long-standing precedents and general practise of Arun and NEVER say ‘thank you’ to any member of the public who assists you in making your official document lawful.

Kind regards,

Richard Ostler.
