Note:

With the exception of dates 17 & 24 Dec 2018, GWL Difference between WS1 & WS2 are generally less than 0.1m, and that GWL between the two boreholes actual correlate well.

Mean GWL difference between WS1 and WS2 is 0.02m

Applying this correction to WS1 GWL for dates 17 & 24 December gives max anticipated GWL @ 49.28m
