I am writing with an objection to the planning application AW/237/19/BL for yet another convenience store positioned at the site of the historic Ship Inn, Aldwick.

The Ship Inn is of historic interest to the village of Aldwick and has been within the community since the 1800's. It has served the community as a public house since then and this is exactly how it should remain.

Within the past few years, this site has had a Morrisons store and a My Local, both of which failed. This is a narrow street with no pathway outside the Ship Inn, Opposite are a few shops, one of which has a convenience store and they too require parking for deliveries and customers.

Numerous daily deliveries to what 'could' be another convenience store will cause disruption to the narrow street, potential danger to pedestrians and a nuisance to nearby residents. This is positioned close to a bend in the road and could potentially cause accidents.

As a resident of Aldwick, we are happy with the shops that we have already and we do not require an additional convenience store within the village. I would strongly recommend this application to be declined on the grounds of safety to residents and the community.
