Hi Nicola

Ref AW/239/20/T

I've just received a letter dated 17 September ref as above with you as the contact.

Your request is for the species of trees T3 and T4. I attach a photograph of the trees (T2 is the Cherry Plum to the left), the next tree T3 is dead and the next one T4 is not clear according to the arboriculturist Ian Stevenson. He did say its not really a tree but I've included it for transparency of what we are doing. Hopefully this clarifies this is the best information I can obtain?

I attach his email explaining same.

Many thanks
