Hi Hannah,

Following our telephone conversation, these are pictures of the two fir trees in question.

My concern is for the fabric of the buildings and fence that are in such close proximity to the trees and their roots. One of the trees is so tight against the boundry fence, I am unable to replace the wooden panel which is in need of repair.

Pic No's

2751-My side of boundry

2732-Showing proximity to my roof

2733-My side, showing closeness of trees to fence

2712- My side of boundry

2745- My neighbours side of boundry

2744-View from neighbours' side, showing my roof

2743-Neighbours side, showing proximity of trees to house

2739&2740-View from neighbour's rear garden (my house is to the left, over the other side of the fence.

In order to take the pictures from my neighbour's garden, I obtained their permission.

I trust these pictures are of help, if you require any more information, please contact me.

Regards,

Nick Fooks.
