

Arboricultural advice – provided by Chris Matthews of CM tree care following site visit with Pete Ansell (RCML secretary) during week beginning 12th August 2019.

Oak tree (TPO AW/150/10 - T213) T1 on plan, to be reduced in crown by approximately 2.5 m where in immediate proximity to Ravenwood Court building (branches can be touched from front window) in order to provide more light for flats numbers 6 and 8, and to reduce collection of dead leaves in drainage gutters and gullies on building roof (roof is beyond reach with ladders).

Beech Tree (TPO AW/150/10 - T212) T2 on plan, to be reduced in crown by approximately 2.5 m where in immediate proximity to Ravenwood Court building in order to provide more light for flats numbers 6 and 8, and to reduce collection of dead leaves in drainage gutters and gullies on building roof (roof is beyond reach with ladders).

London Plane (One of 2 London Planes in TPO AW/150/10 – G203) T3 on plan, to be reduced in crown by approximately 2.5 m where in immediate proximity to Ravenwood Court building in order to provide more light for flats numbers 3, 5 and 7, and to reduce collection of dead leaves in drainage gutters and gullies on building roof (roof is beyond reach with ladders).

Additionally, for each of three trees, a number of small dead limbs have been identified - these will also be removed.

Works will be carried out by climbing trees and working from height, with the resulting arisings chipped and removed to suitable tip.
