Littlehampton
West Sussex BN17 5LF

Many thanks for your help and guidance on talking me through down-loading the forms for making a paper application for work to trees in a conservation area including the guidance notes especially as I am not computer literate.

I have completed the form which I now enclose for your vetting as agreed.

In Question 5 I have put a tick against NO as I understood from our telephone conversation that the Notice pinned on tree on 20 September 2011 was posted prematurely which is why I had not received formal notification and could not find details of TPO/AW/247 /10 with the same date on your website. I see the Notice has been removed.

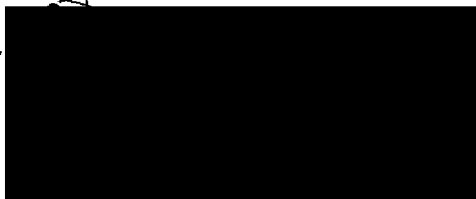

I have enclosed a separate sheet in answer to Question 7 together with two photographs to show the height of the sycamores we would like to reduce in size to provide more light to our garden and those of our neighbours.

In Question 8 I have followed the guide relating to sketch plan to identify the trees. However as trees were allowed to grow to replace those destroyed by the hurricane of 1987 they have all grown at the same rate. As you will see they are mainly sycamores which are self seeded and prolific and generally regarded as tree weeds. They were deliberately chosen to replace the trees that were lost in hurricane even though it was recognised that they would require regular crown reduction and thinning.

All these trees have grown rapidly during 2011.

I trust I have provided all the information you require but please let me know if you require anything further.

Yours sincerely

Roy Fairchild
