Good morning,

Further to our recent application and your subsequent response. You have asked for details of the proposed height and spread measurements. I am sorry to say that we are in some difficulty over this. In all our previous applications (approved) we asked permission to prune our tree back to the previously approved pruning points. We don't know how to accurately give the height or spread of the tree. Any guess might be very inaccurate. I shall attach 2 photos of our tree. In the past our tree surgeon has reduced the branches by about 1 to 1.5 metres in compliance with your requirements. (i.e. to the previous pruning points). You will note that it comprises 4 slender trunks and in strong winds these sway worryingly. It is adjacent to the footpath and road (Aldwick Fields) and we would not wish it to break and harm pedestrians or motorists. We love our tree and wish to keep it healthy by reducing the weight on upper branches.

Please advise us as to how we should proceed in our application.

Yours sincerely,

Graham Clark
