RECEIVED

10 October 2012

Dear Mrs Chapman,

Ref Retrospective Planning Application for Wooden Fencing - 36 Kingsway, Aldwick, Bognor Regis.

Further to the approval reference AW/187/12 dated 25 September 2012, I attach details for the application to clear Condition Number 2 for the soft landscaping scheme.

We have chosen to use climbing plants to be trained to grow up the inside of the fence and hang over the top so that when they mature they will soften the look of the fencing when viewed from the street.

Plant varieties will be taken from the following list;-

Lonicera (Honeysuckle), Clematis, Wysteria, Parthenocissus tricuspidata (Virginia Creeper), Hedera (Ivy) and/or Japonica. Varieties will be chosen for reasons of resistance to honey fungus, overall cover potential and seasonal foliage and flowering to give all year cover and variety where possible.

I hope everything is to your satisfaction, however should you wish to discuss please do not hesitate to contact me.

Yours sincerely,
